

19th ANNUAL STATE OF THE STATES IN HEAD INJURY CONFERENCE

Revolutionizing Systems of Care: Leading the Way

SEPTEMBER 9 - 12, 2008

Williamsburg Marriott Hotel - Williamsburg, Virginia

The National Association of State Head Injury Administrators invites you to its 19th Annual State of the States (SOS) in Head Injury Meeting being held September 9-12, 2008, in Williamsburg, Virginia. The State of the States (SOS) Meeting is the only annual national meeting providing professional development opportunities among state government program administrators in the field of traumatic brain injury. The pre-conference, TBI Model Systems and Evidence Based-Practices: Linking Research to Service Deliver will focus on the current efforts of the TBI Model systems and effective linkage between brain injury state systems and researchers in the brain injury arena. The annual SOS meeting will feature information on Federal legislation and policies impacting TBI and state services, national trends, and cross cutting issues. Of particular interest to TBI advocates will be the TBI Act and FY 2009 appropriations for Federal TBI Programs. The SOS Meeting also offers you an opportunity to network with peers, practitioners, researchers and others interested in brain injury. By attending you have the opportunity to participate in sessions, share expertise, learn what's happening in other states, and learn more about particular areas of concern or interest.

Who Should Attend? While the primary focus of the SOS meeting is on State government services and programs, the meeting is open to all who are involved in the field of brain injury including advocates, individuals with brain injury, families, professionals, and anyone else concerned with planning, prevention, and service delivery for individuals with brain injury.

NASHIA seeks out and appreciates the collaboration and support of national organizations, agencies, and stakeholders in the planning of this vital meeting, including the support we receive from the Health Resources and Services Administration's (HRSA) Maternal and Child Health Bureau, the Federal TBI Program and this year, the National Institute on Disability and Rehabilitation Research (NIDRR) TBI Model Systems. NASHIA encourages other partners to share their ideas and services with participants by sponsoring conference events, presentations, exhibiting, or purchasing advertising space in our Conference Program.

Please join us this September in Virginia for a superior educational program and a great opportunity to network with your friends and colleagues in the field of brain injury!
